CI 103 - Team Charter

Complete the information below for your project. This will inform the instructor about how teams are organized and/or changed. Note that team membership changes are subject to final approval by the instructor.

Team

Lab section: 060

Team Number 04

Team Members and Roles

List the full name and user ID of every member of your team. Assign initial roles that team members will play. Team members without specific roles should be assigned as "Developer".

Name	User ID	Role
Laura-Amira Talaat-Hamid	lt486	Product Owner
Jerry Cherian	jjc423	Database Administrator
Dillon Hill	dh927	Database Administrator
Kevin Wu	kw875	Scrum master

Project mission or Anchor statement:
We are going to develop a simple website which allows our clients to make a reservation for a

restaurant. It will provide features such as restaurant information (open hours, cuisine, delivery, etc.). By

the end of the term, we will have a working website that can make reservations and

Success is …
having a website where you can receive an email after making a reservation, storing reservation information in the database and sending out reminder e-mails.

Done is …
A task is done when another teammate tests the code and functionality. The code must fulfill all aspects of what was initially required for the task, and testing must be done mandatorily.

We work best together when …
- We are in a group together

- We have an idea of what must be done on that certain day

- We share our opinions

- We are in a good environment

- Each person has a task to complete

- We share and discuss our ideas

- We communicate with each other

- We know what goals we all have (especially those that need to be done)

- Using good version control and organization

Team Calendar

Name	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Kevin	After 6	12-4	After 4	After 5	After 5	After 6pm	After 12pm
Dillon	After 3:30	After 1	After 1	After 1	After 1	After 12pm	After 12pm
Laura	After 2	-	After 2	-	FREE	FREE	FREE
Jerry	After 5	After 5	After 5	After 5	After 5	After 7	After 2

Identify the open issues and/or technology gaps related to your project: (100-300 words)
Last term we were not able to meet as often as we should have. In addition, this term, we have very different schedules, so meeting in person will be difficult. However, we have all agreed to make a greater effort to meet together by meeting every Wednesday after 5pm. Another issue we have experienced is difficulty with the database. Last term we tried to learn mongoDB, however it was too difficult to connect node.js with mongoDB. Currently, we don't know how to establish connectivity between our website and database. However, we plan to learn Firebase in order to establish connectivity.
